

### Your objectives

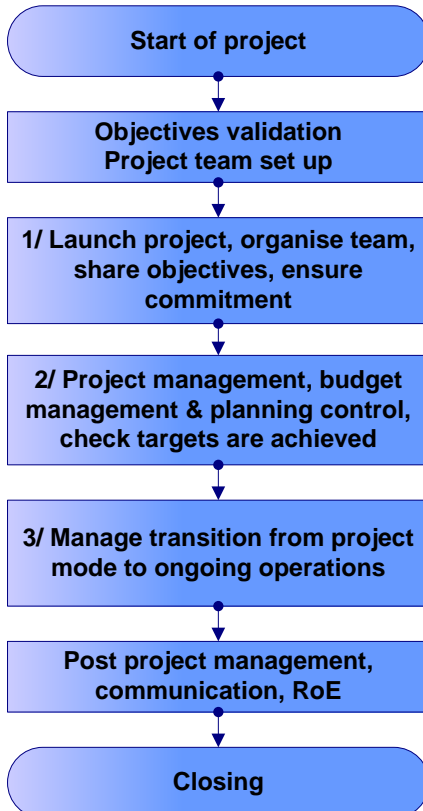

- You need a new warehouse or wish to relocate your activities?
- You are searching for a larger warehouse and must transfer your stock?
- You are looking to outsource your warehouse to a logistics service provider?
- You are creating a flow management control tower or a transport management unit?

### What value are we bringing you?

- A 10 years more of experience in managing warehouses implementation projects and other logistics services all over Europe [Spain, UK, Ireland, Hungary, France, ...] with over 250.000 square meters of capacity created.
- An overall logistics project management methodology, combining standard project tools and techniques adapted to any logistics environment.
- An in-depth knowledge of all the technical aspects of warehousing management : flow design and modeling, WMS functionalities, ITS hardware, EDI & communication networks, purchase and rental of storage and handling equipments, stock organization, operations teams organization, training & education, ...

### Logistics project management

- Your logistics project must be successful to ensure **continuity of service** to your **customers**
- Clear objectives, project competencies & dedication will make it happen! We can help you!
- The 3 main phases of your project are:
- **1/ launching your project:** this is a crucial step, with a strong impact of the overall project success. Project objectives are shared, strong commitment of all project team members is ensured
- **2/ project management:** management of all the technical steps and items of the project, in coordination with the experts from each domain. Advancement reporting to management
- **3/ closing the project:** transition from project mode to operations. Readiness reviews, dry runs, then supporting the start of operations, with possibilities to manage corrective actions on conception defects if detected
- Once operations are running smoothly, project return on experience is performed, reusable elements are identified and archived, internal and external communication of success is organized
